

Review of: "Tweeting AI: A Machine Learning Approach for Bird Species Detection and Classification"

Bharti Thakur

Potential competing interests: No potential competing interests to declare.

1. Abstract should be more clear by mentioning the accuracy of CNN.
2. Introduction is organized well.
3. Literature review should be more clear by adding the latest pipeline of research papers.
4. Percentage of accuracy, precision, recall, F1 score should be in tabular form for the clear understanding of the research in methodology part, also write about the train and test split percentage.
5. No citations are used within the paper and diagrams are not up to the mark, moreover it looks like an article instead of research paper.
