

Review of: "[Review Article] Interventional Radiology And CT Scan in SARS-COV-2: A Review"

Dr. Vikash Mishra

Potential competing interests: No potential competing interests to declare.

The author has done well in compiling an overview of interventional radiology and CT scans in managing COVID-19. However, the article lacks novelty, as a substantial portion of the information presented is generic and widely known. Currently, there is a plethora of literature on the subject, and significant advancements have been made in testing different strains of the coronavirus. It is essential for the article to incorporate more recent and innovative findings to ensure that it adds value and stands out in the rapidly evolving field of coronavirus research. By delving into the latest developments and cutting-edge research, the article can contribute to a more comprehensive understanding of the subject matter and engage readers with up-to-date and intriguing insights.
