Potential competing interests: The author(s) declared that no potential competing interests exist.

The Minimum Innovation Framework (MIF) is a dual focused framework allowing the assessment and ranking of functional and business ability of new innovations (product, service, societal etc.) to solve a desired problem for innovations with or without business requirements for application. The framework consists of both the Minimum Viable Innovation Framework (MVI Framework)^[1] and the Minimum Functional Innovation Framework (MFI Framework)^[2] covering the following framework definitions: Viable Concept (Minimum Viable Concept (MVC)^[3], Viable Design (Minimum Viable Design (MVD)^[4], Viable Product (Minimum Viable Product (MVP)^[5], Functional Concept (Minimum Functional Concept (MFC)^[6], Functional Design (Minimum Functional Design (MFD)^[7] and Functional Product (Minimum Functional Product (MFP)^[8]
