

Review of: "Enhancing Soil Stabilization in Soft Soils Through The Addition of Sand to Soil-Cement Piles: a Comprehensive Study"

Thanh Quang Khai Lam

Potential competing interests: No potential competing interests to declare.

The Introduction is missing proper citation and analysis. This article might improve from additional information and an in-depth review, along with a comparison to other published studies. Further clarification is required for experimental procedures and standards, among other aspects. The reference documents are still in Vietnamese, and the citation type is incorrect.
