Bladder exstrophy

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Bladder exstrophy. ORPHA:93930*

Bladder exstrophy (or classic bladder exstrophy; CEB) is a congenital genitourinary malformation belonging to the spectrum of the exstrophy-epispadias complex (EEC; see this term) and is characterized by an evaginated bladder plate, epispadias and an anterior defect of the pelvis, pelvic floor and abdominal wall.
