

Review of: "Mycetoma in Animals a Review of Cases Reported From 1925-2022; Epidemiology and Management Strategies"

Vanessa Brito de Souza Rabello

Potential competing interests: No potential competing interests to declare.

This review is significant for shedding light on neglected infectious diseases. I suggest including an image depicting the distribution of mycetoma worldwide, such as a map showing cases across the globe, or at least a table documenting cases from 1925 to 2022, encompassing every country where the disease has occurred. Furthermore, it is important to improve the English in the text.
