Potential competing interests: No potential competing interests to declare.

Please define if this is a literature review or a narrative review. In either case, a "method" is required to describe how the articles were selected. Perhaps using more peer-reviewed articles would add richness to this paper. Good historical data but mostly grey literature. What is the problem statement? It was not clear so you might wish to develop this. Based on this review, is there a study to follow given that you have described a safety issue?
