Potential competing interests: No potential competing interests to declare.

1. Abbreviations (DAB / TMB) should be defined in the abstract.
2. The English language of the manuscript is not suitable for publication and needs to be rewritten.
3. The equations of Michaelis-Menten and Lineweaver-Burk should be mentioned in the article.
4. Discussion on difference of (K<sub>m</sub>)s and (V<sub>max</sub>)s when using TMB and DAB should be extended.
5. Different (K<sub>m</sub>)s and (V<sub>max</sub>)s
6. The discussion of the differences in kinetic constants ((K<sub>m</sub>)s and (V<sub>max</sub>)s) when using different substrates (DAB / TMB) needs to be expanded.

I recommend that this article be majorly revised.
