Potential competing interests: No potential competing interests to declare.

I have reviewed the paper which is very publishable but the authors need to expand the results section by double to 3 - fold. The authors could consider including a detailed recent review (Choi H et al . Curr Prob Cardiol 2021;46: March epub PMID 32646544; Amarin R et al. Curr Athero Rep 2020; June 8 EPUB PMID 32514778) and a very recent paper Tsai KZ et al. Am J Hyperten 2023; 36: 102-108.) CJL
