Propranolol Hydrochloride

National Cancer Institute

Source

National Cancer Institute. *Propranolol Hydrochloride*. NCI Thesaurus. Code C29382.

The hydrochloride form of propranolol, a synthetic beta-adrenergic receptor blocker with antianginal, antiarrhythmic, and antihypertensive properties. Propranolol competitively antagonizes beta-adrenergic receptors, thereby inhibiting beta-adrenergic reactions, such as vasodilation, and negative chronotropic and inotropic effects.
