Corynebacterium genitalium

National Cancer Institute

Source

National Cancer Institute. *Corynebacterium genitalium*. NCI Thesaurus. Code C86313.

A species of aerobic or facultatively anaerobic, Gram-positive, coryneform, pleomorphic bacilli assigned to the phylum Actinobacteria. This species is nonmotile, non-spore forming, catalase positive, and not acid fast. Some *C. genitalium* strains are commensal in the urinary tract while other strains are associated with urinary tract infections.
