Respected editor,

Thank you for the opportunity to review this article. The topic is indeed intriguing and holds great potential for learning and contributing to the field of nutrition education among health professionals.

Observations and Comments:

Selection of Nurses:

Please provide a clear rationale for selecting a significant number of nurses in this study. Specify if there is a specific reason or if it relates to their role in healthcare settings.

Study Settings Details:

Consider condensing the study settings information for improved readability, ensuring essential details about hospitals and local government areas are retained. Please maintain the hospitals confidentiality and use alternative names from breaching of confidentiality.

Tool Information:

Specify the language of the tool used in the study. Additionally, include details on how the validity and reliability of the questionnaire were assessed to ensure the tool's accuracy and consistency.

Consent Information:

Include a section on informed consent in the methodology, outlining the process of obtaining participants' consent. Describe measures taken to maintain confidentiality and anonymity, ensuring the ethical rights of study participants.

Newness in Research:

Highlight the novel aspects of your research. What distinguishes it from existing studies? Emphasize any innovative contributions or unique findings in the field of nutrition education among health professionals.

Future Planning and Recommendations:

In the conclusion, discuss your future plans and recommendations. What further research avenues do you suggest, and how can the study's findings be practically applied or inform policy?

Language and Grammar:

Address grammatical errors and improve the overall language quality. Consider seeking input from an English language expert to enhance the clarity and coherence of the article. Please omit the extra ordinary information. Be focus on the study objectives.
