Potential competing interests: No potential competing interests to declare.

Well written but missing important details. Please provide more information on the timeline and setting. You note a tertiary hospital, but what existed prior to MHB? You state something in a COM-B framework, but it is not clear how these decisions were made. Was it a qualitative study that was conducted, or was it a simple panel of experts, etc.? It seems this is a strategic planning document, but I do not understand what makes it scientific or implementable. Please provide more methodologic details.
