

# Review of: "WaveBit — Nonbinary Computation: I Symmetric Cryptography"

Logaraj Vasanth

**Potential competing interests:** No potential competing interests to declare.

Paper seems to be good, but it is not providing complete details. It should present the comparison of the base paper with the proposed work. The equations provided should be explained properly, and waveforms should be explained. The conclusion should be rewritten with details of improvement from the base paper and references. The paper should be reviewed and rewritten.
