Thank you for sending the topic "Application of Data Mining Combined with K-means Clustering Algorithm in Enterprises' Risk Audit" for review. In fact, the research is very good, and I like the way that the research problem is presented, with notes as follows:

1. Giving more importance to the topic in the abstract and conclusion sections.
2. The introduction is very long, and there is no need to list unimportant details.
3. Add the term Big Data to the keywords.

So the paper is accepted for minor changes,

With regards,

Dr. Raya Alothman,
