Potential competing interests: No potential competing interests to declare.

This manuscript presents an investigation into various nanocarriers for protein and peptide drug delivery, a topic of significant relevance in the field. While the authors have laid a foundation for an interesting discussion, I have identified several areas that require attention to enhance the overall quality and impact of the paper:

1. **Detail and Depth:** The manuscript currently suffers from a lack of detailed information in several sections.
2. **Citation and Referencing:** A noticeable number of statements in the text are not supported by appropriate references.
3. **Typos and Grammatical Errors:** A careful proofreading and editing process is recommended to address these issues.
