

Review of: "Maintaining cyberhygiene in the Internet of Things (IoT): An expert consensus study of requisite user behaviours"

Shantha Mary Joshitta

Potential competing interests: No potential competing interests to declare.

The Author completely highlighted all the main findings in IoT cybersecurity.

The only few comments of the paper are as follows:

It would be a great paper if the authors improve the quality and clarity of their presentation

The structure of the paper is not easy to read and more confused and complex, it can be reorganized and reduce the content mainly for discussion section.

More repeated terms are there

It would be better take a recent years papers for reference.
