Monoclonal Antibody CD19

National Cancer Institute

Source

National Cancer Institute. *Monoclonal Antibody CD19*. NCI Thesaurus. Code C2523.

A mouse anti-human CD19 monoclonal antibody (MoAb). CD19 as well as CD22 are cell surface antigens present on a majority of B lymphocytes, including early B progenitor cells. Anti-CD19 MoAb, either alone or in combination with other immunotherapeutic agents, may be used in management of B-cell malignancies.
