Thanks for the opportunity to review the manuscript " Assessment of Quality of drinking waterbased on the water quality index method in Hawassa Zuria Woreda, Sidama Regional State, Ethiopia" (Manuscript Number: Qeios ID: DNX6O2).The work is interesting but regular work. I have gone through the complete manuscript.

1. Abstract is too large.
2. The Abstract, and Conclusion should be more informative and concise.
3. Add study's area map after Description of the Study Area.
4. Introduction is poorly written. Kindly focus the recent citations. Few citations are very poor. References are too old; authors may refer to recent papers. Throughout the paper citing recent references are advised. Please add these in introduction section

1. It is not reflected any novelty. Author must serious about the novelty in the manuscript
2. There are several careless errors, grammar, construction, etc. of the manuscript.
3. Don't reflect the entire finding of the research. Please update significantly.

With this, I recommend the paper for minor revision.
