

Review of: "Natural Polyphenols of Pomegranate and Black Tea Juices can Combat COVID-19 through their SARS-CoV-2 3C-like Protease-inhibitory Activity"

Melina Fernanda Chamorro

Potential competing interests: No potential competing interests to declare.

This article presents an interesting hypothesis. I recommend including evidence supporting the possible bioactivity of the individual compounds or the pomegranate extract. Also, for the idea to gain more solidity, why are these two species proposed? Does the author believe that there may be mechanisms of synergy in the effectiveness? These topics could be a good start. Successes!
