EGFR/HER1/HER2 Inhibitor PKI166

National Cancer Institute

Source

National Cancer Institute. *EGFR/HER1/HER2 Inhibitor PKI166*. NCI Thesaurus. Code C1871.

A pyrrolo-pyrimidine epidermal growth factor receptor (EGFR) protein kinase inhibitor with anti-tumor activity. PKI-166 reversibly inhibits HER1 and HER2 tyrosine kinases, belong to the epidermal growth factor receptor family, thereby inhibiting tumor growth and metastasis.
