

# Review of: "Impact of risk factor diabetes mellitus on patients with periodontitis"

Nisha Ashifa, Neethi Deborah Devadason

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

We thank you for the opportunity to review. The effort taken by the author to write this manuscript is much appreciated. The subject matter chosen is one of the most sought-after topics, where a wide range of literature, with regular updates on recent scientific evidence is available. We feel that this article does not provide the readers with any new interesting information. However, we would like to make some suggestions to improve the article.

1. The article could have been properly organized with appropriate sub-headings.
2. The style of writing could have been more scientifically sound and clear. The contents of the article seemed like a collection of generally accepted statements.
3. The information in the article needs to be inclusive of the latest epidemiological data and recent scientific findings. We recommend the author to refer to recent articles for more updated information.
4. The author could have researched better before coming to conclusions on several key statements mentioned in the article.
5. Sentences could have been crisp and straightforward. The repetitive sentences and paragraphs could have been avoided.
6. Kindly check for plagiarism. Plagiarism is not encouraged.
7. In some places, the author seemed to have deviated from the core details, focusing on the associated conditions, which are understood otherwise.

Overall, this was a good attempt, with scope for improvement.
