

Review of: "Airbase Compatibility with Spatial Planning: A Case Study of Airbase Waterkloof (South Africa)"

Wael Mostafa

Potential competing interests: No potential competing interests to declare.

"The research summary currently lacks a clear emphasis on the topic's significance and fails to showcase the most noteworthy results, essential elements for an impactful introduction to the study. An effective introduction should captivate the reader by shedding light on the research problem and underscoring the crucial importance of the Waterkloof Rule in South Africa.

Turning attention to Figures 2, 3, and 4, there is ambiguity regarding their nature – whether they serve as illustrative figures or actual maps. If indeed representing maps, their utility is compromised by the absence of fundamental components such as scale, north direction, coordinate grid, map legend, map title, and map source. Integrating these vital elements is imperative to enhance the clarity and usability of the maps within the research paper."
