

# Review of: "Efficacy of Anogeissus leiocarpus as a Therapeutic Agent for Some Pathogenic Bacteria"

Mona M. AbdelMohsen

Potential competing interests: No potential competing interests to declare.

Introduction: re-write the sentence "In 2019..... worldwide"

Leaves sample: re-write the sentence "100 gm each..... filtered"

Bacteria species: what is the difference between clinical bacterial isolates and American-typed cultures?

There is no mention of radical scavenging values, FRAP, or DPPH in the title.

The phytochemicals screened for ethanol and aqueous extracts are the same.

Results: where is the test for terpenoids? Does phenol stand for phenolic compounds??

In Table 1: - = absent, then what does - in glycosides mean?

What is meant by quality quantity?

Results of the antimicrobial activity should be re-written to be understood, and Table 2 should be reconstructed.

What is the concept of mineral and proximate contents determination for the bacterial efficacy of the plant?

There should be an alphabetical arrangement of references, and they should be updated.

Discussion and conclusion have no relation to the aim of the manuscript!!!! We moved to a completely different concept.

There should be an abbreviations section.
