

Review of: "Non-dimensionalization of the Compressible Navier-Stokes Equation by Pressure Wavelength and Period revealing its Singularity"

Umair Manzoor

Potential competing interests: No potential competing interests to declare.

It sounds like the paper lacks a cohesive focus and fails to clearly highlight the importance of the problem it addresses. While each section may be independent, they should still contribute to a unified narrative. Consider restructuring the paper to better connect its sections and emphasize the significance of the problem being studied.
