

Review of: "Synthesis of Nickel Nanoparticles Using Ionic Liquid-Based Extract from *Amaranthus viridis* and Their Antibacterial Activity"

Satarudra Prakash Singh¹

¹ Independent researcher

Potential competing interests: No potential competing interests to declare.

1. Production of Ni nanoparticles should be optimised with respect to synthesis-affecting parameters.
2. The Results section should start with the synthesis and optimisation rather than antibacterial activity.
3. Figure legends should be more explanatory with respect to operating axes.
4. Results comparison with the control, as well as contemporary results, are missing in the Discussion part.
