Review of: "Novel Technologies for Intradermal Delivery of Fractional-Dose Inactivated Poliomyelitis Vaccine: A Review of Implementation Research and Implications for Equitable Vaccine Access"

Osede Iribhogbe¹

1. Pharmacology and Therapeutics College of Medicine, Ambrose Alli University, Nigeria

The title is too lengthy; it requires amendments. My suggested title is “ A review of the implementation and implications of the use of modern technologies for the intradermal delivery of fractionated-dose of poliomyelitis”

Abstract: well written

Methodology: Not explicit enough. A flow chart indicating how data was harvested, pruned, and analysed is necessary for this review. Inclusion and exclusion criteria for selection should be well elucidated.

Discussion: well written

Conclusion: Good

Comment: A good article with sufficient contribution to knowledge. The manuscript can be published after the authors have effected the minor correction.

Reviewer: Professor Iribhogbe Osede Ignis
