Groundwater Potential Zone Assessment Using Remote Sensing, Geographical Information System (GIS), and Analytical Hierarchy Process (AHP) Techniques in Fogera Woreda, South Gondar Zone, Ethiopia

REFEREE'S COMMENTS

This is an interesting paper on a subject that should be of great interest to many readers. For the location of comments, see below.

- 1. Title:
- It should be more concise/compact.
- 3. Introduction:
- 4. The literature review should be strengthened. See the papers with the DOIs 10.5004/dwt.2021.27789; https://doi.org/10.1007/s12517-021-08481-6; https://doi.org/10.3390/su15054030; DOI10.12911/22998993/63476;

DOI10.3390/ijerph14121463; and many others already available in the literature.

- 5. A list of abbreviations used would be very informative for potential readers.
- Publication of the papers referred to was found to be rather old.
- 7. Conclusions:
- 8. The authors should quantify their findings in this section.
- 9. Give out a last sentence to indicate the final remark in the paper.
- 10. In General:
- 11. The language has a lack of merit and needs to be polished substantially.
- 12. The quality of the Figures and Tables should be improved.
- 13. The literature review should be extended.
- 14. A list of abbreviations is required.
- Check out the details of the references cited.

Best regards,
