Potential competing interests: No potential competing interests to declare.

I think that the author was very successful in reflecting his own practical experience and insight into the article. This added more value not only to the academic knowledge but also to the best practices in the field. The author has demonstrated that personal experience in the field help to introduce more hands-on approaches to management. I therefore, support final publication of the article and wish the author a very good luck in his future research. I have no further comments on the article.
