

# Review of: "The Influence of Hot Extrusion on The Mechanical and Wear Properties of an Al6063 Metal Matrix Composite Reinforced With Silicon Carbide Particulates"

Abdul Jabbar Ansari

Potential competing interests: No potential competing interests to declare.

1. Introduction part has been loosely written.
2. Add novelty to the work.
3. Microstructural images through the optical microscope or EBSD images should be added.
4. A section titled "Microstructural Analysis" should be added to the manuscript.
