Potential competing interests: No potential competing interests to declare.

The abstract seems to be just a copy of first para of your introduction. Please include methodology, findings of this review and conclusion in the abstract

Methodology is missing after intro part, please include the appropriate methodology that was undertaken to write this paper

Why is discussion following the intro part?

Understanding maternal mortality rate heading could be changed to Understanding maternal mortality as the section also provides details on factors rather than numbers exclusively.

Conclusion is well written
