## Comments for Authors:

1. The introduction section needs references/citations
2. This sentence needs references, "Despite advances in surgical techniques, organ preservation, and immunosuppression protocols, several serious complications still endanger successful short- and long-term outcomes. "
3. There is a typo in this sentence "This study is retrospective, descriptive, and analytic."
4. Results should also be presented using tables
5. Risk factors for the development of BCs may be analyzed using multivariate analysis for better manuscript results.
