

Review of: "Performance Evaluation and Analysis of Electric Vehicle Parameters – A Test Bench"

Latha Ramasamy

Potential competing interests: No potential competing interests to declare.

The paper contains many grammatical errors. Please check the whole manuscript. The literature review of the paper should be strengthened. The point of interest of this paper is extremely general. Looks like a review paper. Novelty of the paper should be emphasized further. The cloud-based estimation of EV performance is not clearly explained. Comparison of the proposed work with existing work should be required. No clarity on how the reliability of the EV is improved. Improve the resolution of figures. Equations should be numbered.
