

Review of: "FLAML-Boosted XGBoost Model for Autism Diagnosis: A Comprehensive Performance Evaluation"

Dr.F.leo John

Potential competing interests: No potential competing interests to declare.

- What is the problem that the paper is trying to solve?
- How does the proposed method address the problem?
- What are the strengths and weaknesses of the proposed method?
- How does the proposed method compare to existing methods in terms of security and efficiency?
- What are the assumptions made in the proposed method, and how do they affect the applicability of the method in real-world scenarios?
- How was the proposed method evaluated, and what are the results of the evaluation?
- What are the potential future directions for research in this area?
- Are there any ethical or privacy concerns related to the proposed method, and how are they addressed in the paper?
