

# Review of: "Protection against a Toxic Environment: Strategies for Planning the Radical Development of Engineering Faculty Members"

Rosa María Brito<sup>1</sup>

<sup>1</sup> Universidad Autónoma de Guerrero

**Potential competing interests:** Congratulations to the author, it is undoubtedly a good investigation. But we need to work on it more. comments: 1. The summary must be concrete, starting with the objective, methodology, main findings and conclusion reached by the author. 2. It is suggested that the author strengthen the literature review 3. Strengthen the methodology, in order to be consulted by other researchers. 4. It is suggested to strengthen the discussion, since in the manuscript the results are not discussed with other research. 5. review the citation in the document, according to the model that the journal suggests. Good luck.
