

Review of: "[Review] Sarcopenia in Coronavirus Disease (COVID-19): All to Know from Basic to Nutritional Interventions from Hospital to Home"

Belgin Akan

Potential competing interests: No potential competing interests to declare.

My assessment of the article;

1. Although it is stated as Figure 1, Figure 2 was written first.
2. Hospitalization should be written instead of hospitalization.
3. As a diagnostic method, tomography (abdominal, thoracic) should also be mentioned.
4. How to tell if hospitalized COVID-19 patients have sarcopenia or acute muscle strength loss? Clarification should be made.
