Sodium Fluoride Positron Emission Tomography/Computed Tomography from the Skull Base to Mid-thigh

National Cancer Institute

Source

National Cancer Institute. *Sodium Fluoride Positron Emission Tomography/Computed Tomography from the Skull Base to Mid-thigh*. NCI Thesaurus. Code C137905.

Positron emission tomography combined with computed tomography of the region encompassing the skull base to the mid-thigh with the use of the contrast agent sodium fluoride F 18 (18F-NaF) to enhance the image.
