The reviewer thinks the concept of the manuscript is quite interesting. However, it needs a minor revision to be considered for publication. Please carefully address the following issues to improve the quality of your paper.

1. Please provide some numerical results in your abstract.
2. Update the references being used in the literature.
3. Give more details about results and expand it more practically.
4. Please grammatically double check your manuscript to avoid unconsciously errors like measures in 8th of the abstract.
5. Please provide some details about the governing equations and mathematical models being used.
6. Also, explain the environmental model and considerations utilized in your estimation.
