Thank you for sharing the manuscript "The Application and Pathway: Regulation of Traditional Chinese Medicine in Lung Cancer Treatment."

The manuscript definitely indulges pioneering strategies in cancer research against multidrug resistance. However, I would request the author to thoroughly revise the article and update it.

For instance, focus on 2.2, "Traditional Chinese Medicine Treating Lung Cancer through the NF-κB Signaling Pathway:

The author must have included some introduction about Astragalus polysaccharide and then explaining the related research data; it will be very informative.

In the conclusion, the author has concluded that Chinese herbal medicine enhances immune function; however, not much research data is explained in the article. At least, the author must have included a few examples.

Regards,

Dariya Begum.
