

Review of: "Symmetric Key generation And Tree Construction in Cryptosystem based on Pythagorean and Reciprocal Pythagorean Triples"

Ram Ratan

Potential competing interests: No potential competing interests to declare.

Following are the review comments:

1. Abstract is not written with clarity and proper connectivity of sentences to highlight the contributions effectively.
2. Keywords are not mentioned.
3. Submission seems like a note presenting materials on methods to generate Pythagorean Triple, 4-tuples and 5-tuples, n-tuples with examples.
4. The submission is not written in the form of any paper format. No proper introduction, proposed method, results and discussions and conclusion sections.
5. Tables not cited in text. References are not cited.
6. Use of triple/tuples are not shown in cryptography.
7. Related work not discussed and References are not cited in text appropriately.
8. Paper is to be rewritten effectively with clarity presenting every section properly to maintain the continuity and connectivity of sentences, and structural organization.
9. English language and grammar need improvements.
