REVIEWER SUGGESTIONS

Overall comments

The manuscript is poorly written. There is nothing any relations with each other section. Check the following comments.

Sr. No	Section	Comments
1	Title	Need to modify.
2	Abstract	Cool Farm Tool (CFT): Not discussed any where throughout manuscript.
3	Induction "Cotton is an economically important crop in Greece, but few reports have systematically quantified the greenhouse gas emissions of Greece's cotton production and analyzed its causes."	Improve the sentence.
4	Introduction	1. Justification of work is inappropriate. 2. Deep review of topic is needed and within one paragraph need to discuss in this article.
		1) Table 1 and 2 reference are missing. 2) Geographical locations and climate of the study area: need to show with fig. 3) System boundaries of the study are missing. Need to explain with help of figure. 4) Fertilizer Application: need to re-write.

5	Materials and Methods	<p>5) Referencing is missing throughout the paper.</p> <p>6) Format of material method writing is not good. Need to improve.</p> <p>7) Material method written in casually, there is nothing any method and materials are discussed properly. Author need to refer previous published articles on this topic.</p> <p>8) Discussion on residue management and how GHG is estimated is absent in material method.</p> <p>9) Discussion on transportation and how GHG is estimated is absent in material method.</p>
6	Results and discussion	<p>1) Result and discussion section is poorly interpreted.</p> <p>2) Results are not compared with previous studies. Need to compare.</p> <p>3) There is nothing any relation between material and method and result and discussion.</p> <p>4) How anyone include the citation in conclusion session.</p>
7	Reference	Check all reference once again.
