Potential competing interests: No potential competing interests to declare.

This article has given good information about the condition of dairy cattle farms in Ethiopia. But for it to be better, it needs to be modified as follows:

- 1- What methods have been used to diagnose metritis or endometritis?
- 2- The most important problem of animal husbandry is subclinical hypocalcemia. Why has this issue not been addressed?
- 3- As you know, one of the most important causes of abortion is viral diseases such as BVD, IBR and others. Provide information about the status of these diseases in Ethiopia or studied farms.
