Liothyronine I-125

National Cancer Institute

Source

National Cancer Institute. *Liothyronine I-125*. NCI Thesaurus. Code C80096.

A radioconjugate of synthetic active thyroid hormone, liothyronine (T3), labeled with Iodine 125. Liothyronine involves many important metabolic functions and is essential to the proper development and differentiation of all cells. I-125 liothyronine may be used in radiotherapy in thyroid cancers.
