**Potential competing interests:** No potential competing interests to declare.

1. In overall the article is useful and informative. However, there is no clear flow from addressing the problem towards a conclusion. Perhaps it is due to the improper formatting and sectioning of the article.
2. This article can be improved by introducing proper flow and having a stronger discussion, since it is already very informative and detailed.
3. The article does not have a proper direction, and the discussions are not supported by evaluations.
4. The article lacks credibility since it is missing relevant citations for sources where necessary in certain sections.
5. The article lacks proper formatting, which makes it appears quite monotonous, and hard to read.
