

Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

A. Yogeshwaran Yogeshwaran

Potential competing interests: No potential competing interests to declare.

The paper exhibits merit in the work, the author undoubtedly works in UWB Antennas and contributes to the growing body of knowledge in this area. The authors' dedication to exploring such a relevant and cutting-edge domain is evident, and their findings hold promise for advancing both theoretical understanding and practical applications. The clarity with which they present their methodology and results is highly commendable. Overall, the paper's valuable contributions to the field and its adept handling of complex subject matter make it a strong candidate for acceptance.
