Potential competing interests: No potential competing interests to declare.

- The abstract of the manuscript needs to be restructured; authors need to include some introduction, and the last need to include concluding remarks of the study
- Authors need to include recent studies; there are outdated studies that have been cited
- The introduction needs to be restructured, and different paragraphs need to be connected well; it looks like a separate study
- The author needs to indicate the research gap well and the objective of the study
- In the methodology, what composition of the milk sample needs to be included
- Discussion of section 3.1 needs to be improved
- Why did TSS decrease during the fermentation process?
- Authors can present the chromatograph
- The GCMS results need to be explained well
