

Review of: "New Method to Identify Potential Illegal Water Use Location by Using Remote Sensing and Neural Networks in Laguna de Aculeo, Chile"

Amina Rezig

Potential competing interests: No potential competing interests to declare.

-Is there a possibility of spreading the study area to the inhabitants to see the impact on the use of water by these inhabitants?

-In Figure 2, it is necessary to specify in the legend what the broken line in white and the numbers 500, 568, 546 mean.
