Evaluation feedback

1. Under the background, avoid very long narratives without supporting empirical evidence
2. The literature review is missing the component of value addition from your study. What is your study adding on to the existing literature in the different sections?
3. No theoretical basis seen for the study
4. Research methodology- Please avoid defining concepts (Answer the questions what, why & how in the methodology as you write)
5. Refer to the table or figure number when describing its statistics for clarity
6. Discussions not backed up with supporting literature
7. No recommendations of the study seen
8. Thank you, good write up, which can be improved.
