Peer Review

# Review of: "(De)-Indexing and the Right to be Forgotten"

Yahya Slimani[1]

1. Université de la Manouba, Tunisia

- Relevance: This paper shows different aspects of the "Right to be Forgotten (RTBF)" in the digital age.

- Structured Organization: Well structured; Good survey of Information Retrieval (IR) models with recent technologies like LLMs and RAG.

- Technical aspects: The complexities of implementing RTBF are well discussed.

- No technical aspects: Balances between technical and ethical implications of IR and de-indexing.

- Areas for Improvement

- Experimental results: Lack of practical examples in a real context. Add experimental results or case studies supporting the proposed technical solutions.

- Conclusion: Give a Conclusion section to show the contributions of the proposal and its limits.
