This review is relevant and provides concise information about nano carriers for protein drugs. I suggest that the authors organize tables with commercial examples for all types of nano systems, as was done for microspheres, table 1.

It is also important to highlight the importance of nano systems for drug solubility as described by Silva et al. (2020), doi: 10.1080/17460441.2020.1750591. I suggest citing this article. I strongly encourage authors to draw a representative diagram of each type of nano system, as it helps the reader with understanding. As well as, illustrative schemes of the proposed encapsulation of protein API in nano carriers.
